Read also the following despatch on the subject from Her Majesty's Secretary of State :—

No. 160 (Revenue), dated London, the 7th December 1893.

From—The Secretary of State,

To—The Government of India.

IN dealing with bills submitted by officers permitted to visit Continental forests, certain difficulties have been experienced in applying the Rules issued by Your Excellency's Government in 1892. I forward a copy of those Rules with the modifications that have been suggested. The change—

In Rule VII is to cover the case of officers who go straight from India to the Continental forests, as Mr. Hooper recently did.

In Rule VIII is to provide that an officer's deputation to the Continental forests should ordinarily be continuous. In a recent case fares for two journeys, to and fro, were claimed.

In Rule IX is to meet the case of a journey for which a return ticket may not be of sufficiently long duration, and also to provide for the case of an officer who goes direct to the Continental forests from the port of debarkation on the Continent.

2. In the event of your deciding to issue modified Rules, fifty copies of the new Rules should be forwarded for use at the India Office.

---

RESOLUTION.

The modifications suggested by the Secretary of State in the Rules in question are accepted by the Government of India, and the Rules as thus amended are issued, in the Appendix to this Resolution, in supersession of those promulgated with the Circular quoted in the preamble.

APPENDIX.

*Rules under which selected Officers of the Forest Department in India may be authorized to study during furlough, at the public expense, forest operations on the Continent of Europe.*

I.—A Forest Officer desirous of obtaining permission to study forestry on the Continent, under these rules, must submit an application, through the Conservator under whom he is serving, to the Local Government.

II.—The Local Government will forward the application to the Inspector-General of Forests, with the remarks of the Conservator and its own recommendation in the case.

III.—The Inspector-General of Forests will submit the application to the Government of India for orders.

IV.—The Government of India will require to be satisfied that the officer applying is likely to profit by the additional experience which he will gain by Continental study, and that he possesses a sufficient knowledge of the language of the country which it is proposed that he should visit.

V.—The application must reach the Government of India not less than four months before the date on which it is proposed to commence a Continental tour.

VI.—If the application is sanctioned, the officer should place himself in communication with the Inspector-General of Forests, under whose instructions the plan of study proposed will be arranged.

VII.—If an officer should be deputed direct from India to the Continental forests, he will receive his orders from the Government in India; but if he should proceed to England, it is advisable that he should report himself to the Revenue Secretary at the India Office, and it will rest with the Secretary of State to decide what localities are to be visited.

VIII.—The total period to be spent on deputation will not, as a rule, exceed six months; and an officer will not be allowed, save in very exceptional circumstances, to proceed to the Continent under these rules more than once. At the end of the period of deputation the officer selected will submit to the India Office a diary showing how his time has been spent, and a report which should indicate fully the nature of the operations studied and which should also include suggestions as to the application of such operations to India. The Secretary of State will decide whether the diary and the report show that the time of the officer has been properly employed, and will determine accordingly for what period the daily allowance admissible under Rule IX may reasonably be granted.

IX.—Each officer will be paid, through the India Office, the cost of a first class return ticket, or two single tickets in cases where a return ticket available for the period of deputation is not procurable, between London and the place to which he may be initially deputed; or if he should proceed to the forests without first coming to England, he will be paid his railway fare from the port of debarkation to the place to which he may be initially deputed and his fare from the latter place to London, provided that the aggregate amount does not exceed the sum to which he would have been entitled if he had proceeded from London. He will also, subject to the preceding rule, be granted a daily allowance of ten shillings during the period of his deputation. Travelling allowance bills in full detail must be submitted to the Revenue Secretary at the India Office.

X.—The reports, notes, and drawings submitted by an officer may not, without the previous permission of the Government of India, be communicated to any professional journal or institution; and the Government of India will be at liberty to print, publish, or circulate them should they think fit to do so.

## REGULATIONS REGARDING THE APPOINTMENT, DUTIES AND REMUNERATION OF EXAMINERS.

---

### Revised Regulations.

#### I.—APPOINTMENT OF EXAMINERS.

1. The Examiners in all subjects, except in Law, shall be annually appointed by the Syndicate (subject to the subsequent confirmation of the Senate) not later than the month of May preceding the examination. Examiners in Oriental, Classical and Vernacular Languages selected for all examinations in the Faculty of Arts shall be persons who have a good knowledge of English.

2. Examiners for all oral and practical examinations shall be appointed by the Syndicate one month before the date of the examination.

3. In cases of emergency, owing to the refusal or inability of an examiner to act, or other cause, when there is no time to bring the appointment of another examiner before the Syndicate, the Vice-Chancellor, moved by the Registrar, shall be empowered to appoint such examiner.

4. As a rule the examiners for the Degree Examinations shall not be the same as those for the Intermediate Examination : provided that where the number of candidates for the Degree Examinations is small, one or both of the examiners for these examinations may be employed for the Intermediate Examination.

5. When the number of candidates for the B. O. L. and M. O. L. Examinations is small, it is unnecessary to provide a second paper as specified below in paragraph 1 of the Duties of Examiners. The English papers shall be translated and centographed, if necessary, on the spot ; the University providing a Translator, who shall be present two hours previous to the examination and be subjected to proper supervision.

### 2.—DUTIES OF EXAMINERS.

1. In all subjects, except Languages, the examiner shall be required to set two papers of equal standard, one for the examination of the Oriental Faculty and the other for the examination of the Arts Faculty.* Except in cases where the examiner who sets the paper is prepared to translate the paper for the examination in the Oriental Faculty and to examine each vernacular answer himself, each paper set for the examination of the Oriental Faculty shall be handed over to a separate examiner, who shall translate the paper and examine the answers.

2. (*a*). Examiners shall be required to distribute their questions with some uniformity over the whole range of the subjects in which they examine.

(*b*). In all examinations in Mathematics about two-thirds of the marks shall be assigned to book-work, or questions involving the direct application of ordinary rules.

(*c*). With regard to examinations in those subjects for which alternative text-books are recommended, examiners are required not to base their questions exclusively on any one of such text-books.

(*d*). In the case of Paper (*a*)—containing explanations of passages in Prose and Poetry and questions in Grammar—for the examinations in English by the Intermediate and B. A. standard, about two-thirds of the marks shall be assigned to questions based on the text-books and one-third to those of a more general character.

(*e*). In the case of Paper (*a*) for the examinations in the Oriental Languages by the Entrance, Intermediate and B. A. standard, about two-thirds of the marks shall be assigned to questions containing passages for translation from the text-books (with explanation and Grammar) and one-third for passages of a similar standard from books not prescribed in the Course.

(*f*). As a rule alternative questions are to be avoided. If given, they shall always be of equivalent value and standard of difficulty.†

3. (*a*). The examiner shall strictly conform to the rules laid down in the regulations for the examination with which he is concerned, respecting the language to be used as the medium of examination in setting and answering the papers.

(*b*). In the Intermediate, Entrance and Middle School Examinations in the case of passages set for translation from the different vernaculars into English the examiner is required to take care that the passages set in the vernaculars shall be of an equal standard of difficulty. In case he is unable to set passages in any one of the five languages specified in the regulations, he shall inform the Registrar, who shall report his inability to the Syndicate, and special arrangements shall then be made to have the papers for translation from and into such vernaculars set, looked over and marked by competent examiners.

* Where the number of candidates for the B. O L. and M. O. L. Examinations is small, it is unnecessary to provide a second paper. (See above para. 5 of Appointment of Examiners).

† Model question papers are under preparation to serve as a guide for examiners in setting papers, in order to ensure stability of standard, but they are not, of course, intended to interfere otherwise with the discretion of examiners.

(*c*). The examiner in Natural Science is required to set a paper for the oral and practical test in that subject, and in cases where there are two examiners, one of them shall be selected by the Syndicate for this purpose.

(*d*). The examiner in English is required to set a passage for the oral examination in English, and in cases where there are two examiners, one of them shall be selected by the Syndicate for this purpose.

(*e*). The examiners in Classical Languages and Persian for the Arts Faculty must themselves translate the papers set by them for the Arts Faculty into vernacular for the candidates on the Oriental side.

4. No examiner shall give any fractional marks for any paper in the results sent to the Registrar.

5. Examiners shall assign marks for each question which shall be indicated in the right hand margin of the paper.

6. Any paper which does not strictly conform to the rules herein laid down may be returned to the examiners for correction by the Registrar.

7. Every examiner shall forward his paper to the Registrar under sealed cover through the registered post, and the Registrar is authorized to reject any paper which is not forwarded in the prescribed manner.

RULES RELATING TO THE RE-EXAMINATION OF ANSWER PAPERS.

1. In every examination as soon as the results have been tabulated, the Registrar shall prepare list of the candidates, who have failed by not more than *five* marks in one subject only, and in order to guard against any undue hardship or inaccuracy in the system of marking adopted, their papers in that subject shall be re-examined by the original examiners, or, in the case of the Middle School Examination, by the head examiners, who will make such recommendations with respect to the marks allotted as they may think proper. Provided that this re-examination shall be required in compulsory subjects only.

The examiner shall be paid for the papers re-examined at the usual rates.

* With a view to prevent parents and guardians from incurring the inconvenience and expense of preparing candidates who may be physically unfit for the Forest Service, it is suggested that, before any such preparation is begun, candidates be submitted to examination by the medical adviser of the family, or any other qualified medical practitioner, with regard to the following points :—

1. A week constitution.
2. Defective vision.
3. Impaired hearing.
4. The existence of any congenital defect.

It is to be understood that this private examination is merely suggested to lessen the chances of disappointment, and that it is by no means intended to take the place of, or to influence in any way, the official examination.

On the subject of the standard of eyesight required for the Indian services a pamphlet has been published under the authority of the Secretary of State in Council, by Messrs. Churchill and Sons, II, New Burlington Street.

† A fee of 4*l.* is required, which can be paid by means of a stamp of that amount. Instructions on this point will be issued to candidates the day before the examination.

‡ Reprints of the papers set at previous examination, together with tables of the marks assigned to the candidates are published by the Civil Service Commissioners, and can be obtained through any bookseller. The price of each reprint is one shilling.

§ Attention is invited to the appended Syllabus, giving further details regarding the extent and character of the examination.

(*e*) From the competitors who attain the above-mentioned minima of marks in obligatory subjects, and satisfy the requisite conditions in other respects, the Secretary of State will select candidates, in order of merit, as probationers to enter the College, where they will be further trained for the Forest Service of India.

(*f*) If the full number of competent probationers required in any year cannot be obtained from the persons so examined, the Secretary of State reserves a discretion to fill up the deficiency by selecting any other person or persons who may satisfy the authorities of the College that he or they are properly qualified to become probationers for the Forest Service.

5. The course of study for candidates for the India Forest Service extends over about three years, divided into nine terms. During eight terms the candidates will prosecute their studies mainly at the College, and during one term (the sixth), which may last for four or five months, they will visit, under suitable supervision, such Continental forests as may be selected for the purpose. Excursions will also be made for purposes of instruction, both during term time and during part of the vacations. The cost of all such tours or excursions is borne by the Secretary of State (see paragraph 9).

6. Each annual session begins in September, and is divided into three terms, with vacations of about four weeks at Chirstmas, two weeks as Easter, and eight weeks in the summer, except at the end of the visit to the Continent when the vacation will be shorter.

7. A charge of 61 *l.* is made for each term except the sixth; for that term the charge is 90*l.* for each student, the duration of the term being longer and the cost of students in the Continental forests being higher than for any other term; the amounts must be paid terminally in advance to the Bank of England. Receiveable orders, with full directions as to the mode of payment, will be forwarded from the India Office to the parents or guardians, shortly before the fees fall due. A student will not be allowed to come into residence until his fee has been paid.

8. A deposit of 5*l.* is required to be paid by each student on admission to the College, as caution money, to cover charges incurred by him for damage to books, instruments, etc., or any College bills outstanding on leaving the College. Any balance over and above such charges will be repaid. This deposit is to be paid with the fee for the first term, making the total payment on that occasion 66*l.*

9. The foregoing payments cover all charges for tuition, board according to the College tariff, lodging, with washing up to a cost of 2*s.* a week, and ordinary medical attendance while in residence at the College. When students are on tour and during the course of practical instruction, whether in Great Britain or on the Continent, the Secretary of State will defray the expenses of (1) board, lodging, and washing (the maximum expenditure on such account being 10*s.* per diem), (2) travelling expenses, and (3) fees to local Forest officers, etc.

Students are required to provide their own class books and drawing instruments. Drawing paper, drawing boards, and surveying instruments are provided by the College.

10. The prescribed course of study at present comprises the following subjects :—

I.—*Auxiliary Subjects.*

1. Geometrical Drawing,
2. Freehand Drawing,
3. Surveying,
4. Forest Engineering,
5. Accounts,
6. German,
7. Mechanics.
8. Physics,
9. Chemistry,
10. Geology and Mineralogy,
11. Entomology,
12. Botany,
13. Drill and Gymnastics.

II.—*Forestry*, Theoretical and practical, in all its branches.

11. Every student is required to conform to the College rules, to exhibit due diligence in his studies throughout the course, and to give evidence of satisfactory progress in such manner as may be required, failing which, or in the event of serious misconduct, he will be liable to be removed from the College, or to be sent back from the forest tour, which may entail the loss of his appointment.

12. During the course of study, the proficiency of the students will be tested by periodical examinations and on the termination of their studies there will be a final examination. Each student may also, at the discretion of the Secretary of State for India, be required to appear before the Medical Board at the expiration of the first year of residence at the College, and should the result be unsatisfactory he cannot claim to be allowed to complete the course.

13. The subjects enumerated in paragraph 10 are grouped in certain main branches of study,* and a fixed minimum of qualification is required in each branch and in the subjects taught during the forest tours, as well as a certain minimum for all branches taken together. Students who obtain these minima will receive the College diploma in forestry.

14. Candidates who have obtained this diploma and are found to be of sound constitution, and free from physical defects which would render them unsuitable for employment in the Forest Department (the final decision on which points will rest with the Secretary of State for India), will be appointed Assistant Conservators in the Forest Department of India in the order of their standing at the end of the final examination. They will be allowed before leaving the College to state their preference in respect to the Provinces to which they desire to be allotted; but the distribution will be made at the discretion of the Secretary of State for India, after consulting the President of the College and the Principal Professor of Forestry, to the several Provinces according to the needs of the public service. The distribution will be made on the understanding that officers are at all times liable to be transferred from one Province to another at the pleasure of the Government of India.

15. Within a month of his nomination as Assistant Conservator, each nominee must sign articles of agreement describing the terms and conditions of his appointment; he must embark for India when required to do so by the Secretary of State, and will be provided with a free passage. Failure to embark at the stated time will, in the absence of satisfactory explanation, lead to forfeiture of appointment.

16. The pay of an Assistant Conservator of Forests will begin from the date of arrival in India. Probationers who acquit themselves creditably during their course at Cooper's Hill College will begin on a salary of Rs. 350 a month. It will, however, rest with the President of the College, in consultation with the Principal Professor of Forestry, to decide whether any of the probationers, though they have obtained the College diploma in Forestry, have failed to deserve that rate of initial salary. Such probationers, if any, will begin on a salary of Rs. 250 a month; and this difference of salary will continue until the first departmental examination is passed in India.

17. Promotion, leave, and pension will be regulated by the rules of the service for the time being. The more favourable pension rules have recently been extended to Forest officers appointed from England, who are thus placed on an equality with Public Works officers appointed from Cooper's Hill College. Any Forest officer, who has rendered not less than three years' approved service at head of his department, has also been made eligible for an extra pension of Rs. 1,000 per annum. A copy of the Regulations relative to these matters can be seen on application either at the Library or the Record Department of the India Office; the principal rules, however, are contained in the Abstract of the Civil Service Regulations, as given in the "India Office List" or the "India List," published respectively by Messrs. Harrison and Sons, 59, Pall Mall, and Messrs. W. H. Allen and Co., 13, Waterloo Place, S. W., either of which can be procured through any bookseller.

18. Every candidate, before proceeding to India, will be required to furnish to the resident of the College satisfactory evid ence of his competency in riding.

GENERAL RULES.

19. Chemical, physical, and botanical laboratories, a forestry museum, a forest nursery, a library, and gymnasium are attached to the College. Means are also provided for the practice of photography. Students making use of the laboratories are supplied with the needful apparatus.

20. The responsibility for the discipline and management of the College and for the superintendence of the studies is vested in the President, under the control of the Secretary of State for India.

21. The students are distributed in divisions, under personal charge of one of the Professors or Instructors selected by the President; such tutor being responsible for exercising the proper degree of personal supervision over each student in his division, and for conducting necessary correspondence with the student's parents or guardians.

22. Each student residing in the College is provided with a separate room, and with fuel and light, also with the necessary attendance. Furniture and bedding are supplied by the College, but students are required to provide their own towels and bed linen. Meals are taken in hall. Wine and beer are not included in the ordinary fare, but can be obtained from the College cellar at fixed prices.

* For details see Royal Indian Engineering College Calendar.

23. A chapel is attached to the College, which the students residing in the College are expected to attend, unless specially exempted.

24. Every student will be required to go through a course of gymnastics and also of military exercise, including the use of the rifle.

25. Students are required to wear academical dress, under such regulations as may be prescribed from time to time.

### STUDENTS NOT NOMINATED FOR THE INDIAN FOREST SERVICE, BUT DESIROUS OF OBTAINING A DIPLOMA IN FORESTRY FROM COOPER'S HILL COLLEGE.

26. Students not nominated for the Indian Forest Service may be received into the College, as far as the available accommodation permits. Such students may pass through the course of instruction prescribed for the nominees of the Indian Forest Service, as detailed above, or they may be permitted to participate in the instruction given in certain subjects only. On attaining the prescribed minima of marks in the several branches of study and in totals as laid down above, they will receive, as the case may require, either he College diploma in Forestry or special certificates showing in what subjects they have followed the instruction, and with what result.

27. Candidates who desire to be admitted under paragraph 26 may submit the necessary application at any time, but not later than the 15th day of June of the year named for admission, except with the special permission of the President. The application must be made on the prescribed forms, which can be obtained from the Secretary of the College.

28. Candidates whose applications are found satisfactory as to character and in other respects will be required to undergo an examination, to be held at the College, about the last week in June of the year for admission. The object of the examination will be to ascertain whether the candidate is qualified to follow the course of instruction with advantage (or certain parts of it, as the case may be). Candidates who do not come up to the required standard will not be admitted to the College.

The President may dispense with the whole or any portion of this examination in the case of a candidate who produces an University diploma, or other similar certificate granted by a recognized examining body.

29. Candidates admitted to the College under paragraph 26, who propose to pass through the full prescribed course of study, will be required to pay the same fees in every respect as those paid by the nominees for the Indian Forest Service. Candidates who do not become resident, and are admitted only to certain subjects of study, will be required to pay the fees which may be fixed in each special case in consideration of the extent of their studies. The candidates of both classes will be required to abide by the general rules of the College.

## FOREST EXAMINATION.

### SYLLABUS.

### SHOWING THE EXTENT AND CHARACTER OF THE FOREST EXAMINATION.

In a letter addressed to the Civil Service Commissioners on the subject of the examinations for admission into the Royal Military Academy, Woolwich, and the Royal Military College, Sandhurst, the Director-General of Military Education observes :—"The main object to be borne in mind with reference to the Entrance Examination is to secure a youth who has had a thoroughly well-grounded liberal education as an English gentleman. Any curriculum which renders those who are unsuccessful unfit for other professions is greatly to be deprecated." The Regulations for the Forest Examination, which follow the lines of the Sandhurst Examination, are intended to provide a test that the Candidates have received such an education as is indicated in these words. By these Regulations certain of the subjects specified are prescribed as obligatory for all competitors, while, in the choice of the subjects described as optional, allowance is made for varieties of taste and inclination in each Candidate. In view of the influence which the Regulations must necessarily exercise on the education of Candidates for admission to the public service, the

Civil Service Commissioners deem it expedient to specify, with more fulness than in the Regulations themselves, the character of the examination which the Candidates will be called upon to undergo.

CLASS I.

(OBLIGATORY SUBJECTS.)

*Mathematics.*—The extent of the examination will be as defined in the Regulations.

*English Composition.*—An Essay to be written on one of several subjects specified by the Civil Service Commissioners on their Examination Paper.

*German.*—There will be translations of unseen passages from German into English, and from English into German; the knowledge of pronunciation will be tested by dictation and the *vivâ voce* examination. The passages for translation will be taken mainly from standard authors (Schiller, Lessing, Alexander v. Humboldt, Ranke, etc.); and a few simple questions may be asked on the passages set, as to the structure and character of the language, and allusions of obvious and general interest.

CLASS II.

(OPTIONAL SUBJECTS.)

*Higher Mathematics.*—The extent of the examination will be as defined in the Regulations.

*Latin.*—Passages will be set for translation into English selected from the authors usually read in schools. Passages from English authors will be given for translation into Latin prose and verse, but Candidates will be allowed, in the place of verse composition, to answer questions of a simple character, which will test whether they possess a fundamental knowledge of the grammar of the language, and such an elementary acquaintance with Roman History as is required for the intelligent study of the books they have read.

*Greek.*—Passages will be set for translation into English from the authors usually read in schools, and in other respects the examination will proceed on the same lines as in Latin.

*French.*—The passages for translation will be taken from standard authors (Corneille, Madame de Sévigné, Guizot, Taine, etc.), and in other respects the examination will proceed on the same lines as in German.

*English History.*—The General Paper in this subject will test whether the Candidates are accurately acquainted with the facts of English History, and also possess an intelligent knowledge of the meaning of the facts. The paper on the fixed period will, of course, require from the Candidates more minute knowledge than the General Paper.

*Botany, Chemistry, Physics, Physical Geograhphy, and Geology.*—The standard of examination in these subjects will be such as may be reasonably expected from the education given at schools possessing appliances for practical instruction, such as a laboratory, etc. A considerable portion of the marks will be allotted for the proficiency shown in the practical part of the examination.

GENERAL.

*Handwriting.*—In estimating the papers of Candidates, a limited number of marks, namely, 100 out of the maximum allotted to each subject, is assigned for handwriting.

Mr. C. Webb (Thos. Webb & Sons' Glass Works).
Mr. D. Webb (Molineaux, Webb & Co. Glass Works).
Mr. J. Silvers Williams (Stevens & Williams' Glass Works).

Scope.

The Exhibition will be strictly confined to the display of Decorative and Artistic Pottery and China, and Optical, Decorative and Artistic Glass, manufactured in the United Kingdom, and to the practical illustrations of processes in the manufacture of Pottery, China and Glass.

No United Kingdom Exhibits will be received from other than *Manufacturers.*

Designers may not be Exhibitors.

Period.

The Exhibition will be open daily (except Sundays) from 11-0 A.M. until 11-0 P.M., from the middle of M to the middle of September 1894.

Space.

The Exhibition will take place in the lower North Gallery of the Institute, which is 701 feet long, and has a general width of 29 feet inches, intersected by 42 piers—21 on each side. The width of the Gallery between the piers is 16 feet 1 inch. In the centre of the Gall

there is a bay (or recess) 87 feet long, the Gallery at this point being 36 feet 9 inches wide. The exact superficial area of the Gallery is 18,097 square feet. The Central Recess will be reserved for the exhibition of processes. There will be a passage way of 8 feet 6 inches preserved throughout the whole length of the Gallery, leaving, therefore, a total "exhibiting space" of (say) 12,000 square feet. Exhibitors' cases will be placed at intervals at right angles to the North Wall, with one face against that wall. The Eastern half of the Gallery will contain the Exhibits of Pottery and China; and the Western half the Exhibits of Glass; while it is suggested that every alternate window throughout the Gallery should be placed at the disposal of manufacturers of Stained Glass.

Liability of Exhibitors.

Exhibitors will incur no liability for expenses connected with the general administration of the Exhibition.

The Imperial Institute, in pursuance of its objects as defined by the Royal Charter, which include the encouragement and development of British manufactures and industries, will provide space free of rent; also attendants, lighting, and all needful supervision and general facilities incidental to the Exhibition as a whole.

Exhibitors will be expected to provide, at their own cost, the Exhibits, Glass Cases and Fittings, and to incur the cost of transit to and from the Institute, and of the necessary attendants for the installation and arrangement of the Exhibits.

Processes.

As regards Processes, the Imperial Institute will be prepared to receive applications and to provide motive power to a moderate extent, for the display of such processes, subject to the Executive Council being of opinion that the utility and attractiveness of the process to be illustrated is sufficient to justify the outlay thereby involved.

Exhibitors.

The Committee of Advice has selected and recommended to the Council a preliminary list of Firms under two Heads :—

(I) China and Pottery,

(II) Glass,

to whom invitations to exhibit are being transmitted.

Sales.

No Sales will be allowed, nor will Exhibitors be permitted to take orders for articles at the Exhibition. No circulars or trade cards must be distributed by Exhibitors.

Catalogue.

A Catalogue will be issued and sold in the Exhibition, in which a reasonable description of the Exhibits, and of any special features to which attention is called by the manufacturers may be inserted.

The exhibiting space of the two branches will be allotted by the Committee of Advice in proportion to the demand, amongst those firms included in these lists (or in subsequent lists, to be approved by the Committee) who may consent to exhibit.

All Exhibits, Glass Cases, Fittings, &c., must arrive at the Institute not later than noon on Wednesday, May 9th. No Cases or Exhibits will be received after that date. The Exhibits must be installed and arranged in their cases not later than noon on Saturday, 12th May.

The Executive Council reserve to themselves the right of refusing to admit to the Institute-premises any Cases, Fittings, or Exhibits arriving after noon on the 9th May, and to remove from the Exhibition Gallery, at the cost of the Exhibitor, any Exhibits, Cases or Fittings, the arrangement of which may not be completed to the satisfaction of the Council, by noon on the 12th May. In such instances the Executive Council reserve the right to dispose, at their absolute discretion, of the space which thus may become available. Exhibitors will not be allowed to supplement or change their Exhibits during the time the Exhibition remains open.

The acceptance by a Manufacturer (firms or individuals) of the invitation to exhibit will be taken as consent on his part to allow all his Exhibits, Cases and Fittings to remain undisturbed in the Galleries until the close of the Exhibition, and as an agreement on his part to the right of the Council to order, or, if necessary, to cause, without explanation, the removal of the Exhibit at any time they may think proper, and further, as an agreement to abide by the Regulations here set out.

The Executive Council, while undertaking to supply adequate general control, watching, and care, accept no responsibility or liability as regards the Exhibits in respect of damage or loss by fire or accidents, or otherwise.

An invitation to a manufacturer to exhibit will be considered as cancelled if a definite reply is not received within fourteen days of the despatch from the Institute of the invitation.

All communications should be addressed to—

2. The following subjects were considered by the Conference :—

(1) The Science and Commercial Courses recently adopted by the Punjab University: how far may the schools be expected to encourage these?

(2) Should the rules applicable to Public School boys and private candidates as to admission to the Entrance Examination be made to apply to the higher examinations of the University?

(3) The allotment of time for the teaching of Object Lessons in each class of the Primary Department of Board Schools;

(4) Should the courses in Geography be revised so as to exclude from Article 196 (*d*) "A knowledge of the most outstanding features of Indian Geography," and to change in Article 197 (*d*) "The Outlines of the Geography of the World" into "A general knowledge of Europe"?

(5) Should the courses in Arithmetic be revised so as to add part of the Multiplication Table to the First Primary Class, and reduce somewhat the amount prescribed for each of the other Primary Classes?

(6) Whether Inspectors ought to examine an Unaided School, which has acted in a manner in which schools subject to the Inter-School Rules are forbidden to act;

(7) Since the Introductory Primer is no longer prescribed for the Middle School Examination, should the time given to Physical Science in Middle Schools be curtailed?

(8) To provide in Article 232 that free and half-rate studentships be given to poor boys according to their ability, and that such studentships be not given to boys whose abilities are not promising;

(9) To provide in Articles 227 and 228 for the striking off from the lists of free and half-rate scholars the names of any boys on account of idleness or irregular attendance;

(10) Should the provision of Article 227 be made applicable to Zamíndári Schools?

(11) Should Attendance and Staff Grants for Indigenous Schools be continued; and, if not, should the Instruction Grants be correspondingly raised? If the Attendance Grants are continued, should a Note be added to Article 123 limiting the grant to those scholars only who read a printed book, and disallowing it, if the Registers of the Schools are clearly unreliable?

(12) Should the scale of English Teachers for Middle Departments under Article 83 be increased, now that English has been made the medium of instruction in Geography and Arithmetic?

(13) Revision of the last clause of Article 155 requiring the lesson necessary before a Teacher's Certificate can be made permanent to be given in the presence of the *Inspector*;

(14) Should the second clause of Articles 184 and 185 providing for the award of Female Teachers' Certificates of the Second Grade to candidates who have failed in the examinations be revised?

(15) Is a special provision for the issue of Female Tea chers' Certificates required under Article 193?

(16) Reconsideration of the place given to Mathematics in the Senior Anglo-Vernacular Certificate Examination. If the present regulation be retained, should the Special Certificate for teaching Mathematics be open to those only who gain the ordinary Senior Anglo-Vernacular Certificate?

(17) Should Article 526 be modified so as to give District Inspectors the authority of an Inspector in the schools under them?

(18) Technical and Industrial Schools: how far do the circumstances of the country seem to require these?

3. Regarding Question (1), the Conference adopted the following resolutions:—

(1) That the new Entrance Science Course should be introduced into the Central Model School, Lahore;

(2) That Municipal Committees of the First Class be invited to make provision for teaching the new Entrance Science Course in their schools;

(3) That Government be moved to make suitable provision in its own College at Lahore for teaching all the branches of Science required for the Intermediate and Bachelor Examinations in Science, and, if possible, to induce Aided Colleges to do the same;

(4) That the principal Aided Schools in the Province be invited to co-operate with the Department in introducing the Entrance Science Course, Staff Grants being made available for the extra Science Teachers required;

(5) That Government be moved to draw the attention of Local Bodies, in important commercial centres, to the regulations for the Clerical and Commercial Examination recently adopted by the University, so that arrangements may be made, whenever it is deemed necessary, for the provision of teaching for this examination, whether by evening classes or otherwise; and that this examination be accepted by Government as equivalent to the Entrance Examination as a qualification for admission to Government employment.

The Lieutenant-Governor accepts the recommendation of the Conference as regards (1), the arrangement having been previously anticipated for both the new Science and the Clerical and Commercial Course (*vide* Article 600, *Note*, of the Punjab Education Code); and effect will be given to the same when the means become available, and scholars desire to adopt the courses. With regard to (2), the Boards concerned will be authorised, by a Note to Article 459, to make the provision suggested, *as far as may appear desirable*. His Honor agrees with the Conference that it would be advantageous if further provision were made for the teaching of Science in the Government College, Lahore; but, as this is a matter chiefly of expenditure, the straitened condition of the Public Funds forbids its being favourably considered at present. The extent of the provision proposed in (3) would be much beyond the means of the Punjab

Government. As to (4), the Lieutenant-Governor approves of Staff Grants being made available for Science Teachers in Aided Schools, employed on account of the new Entrance Science Course; and a Note will be added to Article 83 to that effect. With regard to the first part of (5), the attention of the Local Bodies will be invited to the new Clerical and Commercial Course as recommended; and they will be authorised, under Article 459, to make provision for the teaching of that course, *when deemed necessary.* The second part of (5) will be referred for consideration in the Administrative Department of the Government.

4. The opinion of the Conference regarding Question (2), that any assimilating of the rules for admission to the higher examinations of the University to those now existing for the Entrance Examination should be left to the University itself, is accepted by the Lieutenant-Governor; and no order is required.

5. Question (3) had reference to the allotment of time for the teaching of Object Lessons in the Primary Classes of Board Sohools; and the Conference resolved—

(1) That half an hour a day should be given to this subject in each class of the Lower Primary Department, and an hour and a half a week in each class of the Upper Primary Department;

(2) That, in Vernacular Schools, the time required for Object Lessons should be taken from the time now given to Urdu;

(3) That, in Anglo-Vernacular Schools, the time should be taken from Urdu, the courses of reading in that language being reduced.

The Lieutenant-Governor approves of the first two decisions; but he is averse to reducing the time given to Urdu at this stage, as proposed, and prefers taking one hour a week from Urdu in the Fourth Class and half an hour from English, and, in the Fifth Class, the full hour and a half from English, leaving in each class 5 hours a week for Urdu, and $13\frac{1}{2}$ hours for English.

6. On Question (4), regarding the courses in Geography for the Lower and Upper Primary Examinations, the Conference decided—

(1) That the words "along with a knowledge of the most outstanding features of Indian Geography" be omitted from Article 196 (*d*) of the Code;

(2) That "The Outlines of the Geography of the World" in Article 197 (*d*) be defined to mean—the continents, oceans, and the more important seas, rivers, mountains, countries, towns, &c., and that a map should be prepared indicating exactly the extent of knowledge required.

These decisions are accepted as regards the courses, and will be given effect to in the Code. The matter of the map will be referred to the Text-Book Committee.

7. Question (5), concerning the courses in Arithmetic for the Primary Classes, was referred to a Sub-Committee, with the instruction that the courses for the Middle Classes should also be considered; and, on the Sub-Committee's report (Appendix I), the following recommendations were adopted by the Conference:—

(1) That the Multiplication Table up to 6 × 16 should be added to the present course for the *Infant Class:*

(2) That the courses for the other Primary Classes should be reduced to the following:—

*Second Class.*—Notation and Numeration up to 100,000; Addition and Subtraction; Multiplication Table up to 16 × 16;

*Third Class.*—Notation and Numeration; the four Simple Rules;

*Fourth Class.*—The Compound Rules in Indian Money; Tables of Weights and Measures in common use in India;

*Fifth Class.*—Reduction and the Compound Rules in all Weights and Measures in common use in India; G. C. M. and L. C. M.; Addition and Subtraction of Vulgar Fractions:

(3) That the courses for the Middle Classes in Anglo-Vernacular Schools should be as recommended by the Sub-Committee, *viz.*:—

*First Class.*—Part I of Lock's Arithmetic for Indian Schools;

*Second Class.*—Chapters VII to XI of Lock's Arithmetic;

*Third Class.*—Chapters XII to XIV and Square Root:

(4) That the courses for Vernacular Middle Schools remain as at present.

The Lieutenant-Governor accepts the recommendations of the Conference as regards (1), (3), and (4), with the exception that he would prefer under (3) to substitute Chapters III to VI of Lock's Arithmetic for Part I as the course for the First Middle Class, thus limiting the amount of revision in that class to the readings of the two previous years; but His Honor cannot approve of the reductions proposed under (2), and is altogether opposed to the lowering of the Arithmetic standards. The Indigenous Schools of the country maintain higher standards in this respect than European Schools; and this is an immense practical advantage, any loss of which would be much to be deplored.

8. Regarding Question (6), the Conference resolved—

That Inspectors should be directed not to examine Unaided Schools of which the Managers do not observe the Inter-School Rules, or which, in their opinion, are in inefficient hands.

This proposal is accepted in a somewhat modified form, the words "it is in the power of Inspecting Officers not to examine" being substituted for "Inspectors should be directed not to examine," and the words "which after being examined twice appear to be so inefficient as not to be worth the time and trouble required for examination" for "or which, in their opinion, are in inefficient hands;" and effect will be given to this by a Note to Article 738.

9. The resolutions of the Conference on Questions (7) to (11) were the following:—

(1) That the time given to Physical Science in the Middle School classes should be four hours a week, as at present; that, in the First Class, Object Lessons in Elementary Science should be taught in place of the Introductory Primer; that, in the Second Class, the Physics Primer should be read up to the Chapter on Heated Bodies; that, in the Third Class, the Physics Primer should be finished and revised; and that, in the Second and Third Classes, two of the hours every week should be given to an examination of the instruments and practical work by the scholars themselves, under the direction of the Teacher;

(2) That the following Note should be added to Articles 227 and 228:—

"Boys admitted under this rule must be boys of ability, and between equally deserving cases on the ground of proverty, preference should be given according to the ability of the applicants;"

(3) That the Note to the two Articles proposed above provide "that the concession may be withdrawn on account of either idleness or irregular attendance;"

(4) That in Article 227, the words "the preceding Article" should be replaced by "under Articles 222 and 226," and the words "and Zamíndári Schools" added after "in Primary Departments;"

(5) That the following clause should be added to Article 123:—

"The full rate will not be given where there is good reason to suspect the reliability of the Attendance Register;"

and the following to Article 130:—

"The full rate shall not be given unless the general condition of the school is satisfactory."

The Lieutenant-Governor approves of these recommendations; and the necessary alterations and additions will be made in the Code. With regard to Object Lessons in Elementary Science for the First Class of Middle Schools, the Text-Book Committee will be desired to suggest a Course of Lessons.

10. Question (12), regarding the number of English Teachers in Middle Departments eligible for Staff Grants, was referred to a Sub-Committee, on the report of which (Appendix II) the Conference adopted the following proposal:—

That in Article 83, against (*b*) Anglo-Vernacular Schools, Middle Department, the scale of staff admissible should be changed into—

| | |
|---|---|
| " For not fewer than 20 scholars | Two English Teachers.<br>One Vernacular Teacher.<br>One Arabic or Sanskrit Teacher, if the subject is taught. |
| " For not fewer than 50 scholars | One Arabic and one Sanskrit Teacher, if both languages are taught. |
| " For every 50 scholars or fraction of 50 after the first 80. | Two English Teachers.<br>One Vernacular Teacher." |

This proposal is accepted; and Article 83 will be modified accordingly.

11. On Questions (13) to (15), the following were the decisions of the Conference:—

(1) That the last clause of Article 155 should stand thus—

"No certificate shall be made permanent until the teacher has given a lesson, in the case of Secondary Departments, before the Inspector, and in the case of Primary Schools and Departments, before the Inspector or Assistant Inspector;"

(2) That in the second clause of Articles 184 and 185, the words "but have not succeeded in passing the Certificate Examination" be changed into "but have failed to pass the Certificate Examination in a subject or subjects other than School Management and the Practice of Teaching;"

(3) That the first sentence of Article 193 be altered into "Senior Anglo-Vernacular Certificates for Male Teachers, and all Certificates for Female Teachers are issued under the signature of the Director," and that the qualification "for Male Teachers" be added after the words "under Article 163."

The Lieutenant-Governor accepts these decisions; and the necessary alterations will be carried out in the Code.

12. Regarding Question (16), the Conference recorded the following resolutions :—

(1) That the circumstances of the Punjab are such as to make the establishment of Technical and Industrial Schools highly desirable, and that a plan for their systematic development should be adopted at an early date;

(2) That, in view of the importance of the interests involved, a distinct and separate annual grant should be made for Technical Education.

The Lieutenant-Governor would require to have the matter considered in much more detail, and in all its bearings, before accepting either proposal; but, apart from this, he would prefer to leave it where it is, pending the action that may be taken in connection with the Despatch (No. 128—Public, Educational—dated 9th November 1893) from Her Majesty's Secretary of State for India, the report of the Lahore Art Conference, and correspondence now proceeding on the subject with the Government of India.

13. On Questions (17) and (18) the Conference recorded the following resolutions :—

(1) That Mathematics be again made a compulsory subject in the Senior Anglo-Vernacular Certificate Examination;

(2) That, as English is now the medium of instruction in Arithmetic, Mensuration, and Geography in the classes of the Middle Department, these subjects should be made compulsory in the Junior Anglo-Vernacular Certificate Examination;

(3) That a Note should be added to Article 526, to the effect that the authority given to Inspectors under that article extends to District Inspectors in respect of the Vernacular Schools open to their inspection.

These decisions are approved.

14. His Honor the Lieutenant-Governor is indebted to the Members of the Conference for the time and attention given to the subjects submitted for their consideration; and he desires to convey to them the thanks of the Government for the helpful results of their labours.

*His Excellency the Viceroy's speech.*—When the introductions were completed, the Viceroy and Governor-General delivered the following address to the Chiefs, Sardárs and Native Gentlemen assembled in Darbár. A translation of the address in Hindustáni was afterwards read by the Chief Secretary to the Government of the Punjab :—

PRINCES AND CHIEFS OF THE PUNJAB,—It has, I think, been said that in our meeting here to-day we renew the practice of a former generation. It is not unnatural that men's minds should turn to the proposal to hold a Darbár in this city that was made more than 30 years ago, but was not carried out, under circumstances deeply affecting myself, which I am touched to find remembered in many parts of the country. Though a generation has brought with it many changes, it has not, I think, affected what was, and is, the main consideration in summoning such an assembly—that it is good and proper and advantageous that those who are engaged in a common enterprise should come together and judge for themselves with what manner of men they are working. That at all events has been the practice of my predecessors who have constantly held Darbárs in the Punjab, and that is my object now. I have in the performance of my official duty been passing to and fro throughout your Province during the last six weeks; and it seems to me that I need make no apology for asking you, who have so great a stake therein, to meet me here that we may see each other face to face, and join hands over the great work in which we have each one of us our duties and responsibilities, of securing so far as we can the peace, prosperity, and progress of the Punjab.

Let me say now in public what I have already had an opportunity of telling some of you in private,—that it is with the greatest satisfaction and pleasure that I find myself here surrounded by the loyal Nobles and Gentlemen of the Punjab, the representatives of those who, in that former generation of which I have spoken, came to our aid in the hour of peril; of those who for many a year have shown themselves second to none in the ranks of our army by their loyalty, devotion and courage; of those who I am certain will, if need there be, stand with us shoulder to shoulder in defence of the Empire of our Sovereign—the Queen Empress.

The time has not yet come when we can set aside as of no account the martial instincts of a race. Journeying round the Frontier, and examining the forts erected for its defence at great cost, now well nigh complete, I could not but think that there was only one thing more required to make our positions impregnable, and that was brave men to hold them. Here in the home of brave men we have seen yesterday the fine regiments of the Imperial Service Troops which the Princes and Chiefs of the Punjab have raised for the avowed purpose of testifying to the world their determination to make common cause with us in the defence of the Empire. It will be my pleasing duty to report to Her Majesty, knowing as I do how sincerely she appreciates such proofs of loyal devotion from the Princes and Chiefs of India, the gallant bearing of the troops that I have seen here.

One word of caution I may add. We seek to be strong that we may be at peace. We have no ambition for conquest, no desire to extend our boundaries, no other wish than to cultivate friendship with our neighbours.

From a recent speech of the Prime Minister of England you will have learned that there is reason to hope that the time is approaching when all risk of the clashing of Russian and British interests in Asia will be obviated; and I venture to say no more welcome intelligence could be conveyed to any lover of India.

We have the great advantage of a firm friend and ally in the Ruler of Afghínastán. His Highness the Amír, whose recovery from his late illness we all hailed with pleasure, has honorably recognised the obligations of the Treaty

of last year. The difficulties of an undefined frontier have already been removed in part, and will I hope soon be entirely swept away by the efforts of Afghán and British Officers working on terms of the most complete amity.

It is our aim and ambition so to regulate our relations with the brave undisciplined inhabitants of the hills on our western border as at the same time to ensure the peace and security for life and property upon which our Treaty obligations and the dictates of humanity compel us to insist, and to leave to them the entire occupation of their country, the fullest measure of autonomy, and the most complete liberty in their internal affairs to follow their tribal customs.

I need not say with how much regret I have seen clouds arise in Wazirístán, and darken the prospect. I trust they will roll away. I can safely assert on behalf of the Government of India that though they will not allow any obstacle to prevent their pushing on to their goal, and establishing, as they intend to do, peace and order on this part of your frontier, they will not deviate from the profession I have just made, will not be turned aside by any desire for retaliation, but will maintain their set purpose of securing by peaceful means, if at all possible, one of the last links in the chain of friendly peoples.

Do not think that this is a policy we follow on the Punjab frontier alone. In the extreme West and the extreme East we are sending out Commissions with a view of determining with Persia and with France the sphere of our influence, and removing possible cause of quarrel. The conventions recently concluded with China provide for the settlement of the frontier of Burma and the promotion of trade by uniting the telegraphic systems of the two countries. The respect which we have shown for the conditions, especially in the matter of intercourse, which our neighbours consider essential for the maintenance of their independence, even though to our eyes they may seem unnecessary, has borne fruit in the convention for the purpose of opening up trade with Tibet, and in a thoroughly cordial understanding with our gallant allies in Nepal.

The fact is that this might well be termed the era of delimitation. As all over the world nations are settling disputed boundaries, so are we in India, in the hope that before many years have passed we may see our boundaries fixed from the Persian Gulf to the Malay Peninsula. It is a process which if carried out successfully must make for peace, and all here present will join with me in the earnest hope that the fair prospect which I have laid before you will remain unobscured.

If this be so, how are we to use our opportunities? The history of the Punjab during the last thirty years gives no uncertain indication of what can be done to promote the general prosperity. I have examined some very remarkable figures in connection with this subject, but I cannot on this occasion go too deeply into detail. Speaking generally the prosperity of a country is increased—

(1) by making available the latent resources which it naturally possesses;

(2) by giving security to every man for his just share in the fruits of the earth or the products of his industry ; and

(3) by every step forward in civilisation, by the banishment of ignorance by means of education, of lawlessness and crime by firm and impartial administration of wise and just laws.

In considering the development of a country like this we naturally look first to the condition of agriculture. In the Punjab the area under cultivation has increased since 1863 from 16,800,000 acres to 26,700,000 acres. No one can doubt the importance of this increase which improves the resources of the

Province and the revenues of its Government. I invite attention to the increase in the cultivated area which taking into consideration all possible deductions may be stated at not less than 50 per cent., while the corresponding increase of revenue from 195 lakhs to 242 lakhs has not been more than about 35 per cent. This is some evidence that Government has not been unmindful of the interests of the people. I have with my own eyes seen instances of friendly feeling between the officers of Government and the people which encourage me to believe that the present members of the Punjab Commission appreciate and loyally endeavour to maintain the traditions of the policy which will ever be identified with the names of Henry and John Lawrence.

And if we ask how the increase has been obtained, the answer is not far to seek. Irrigation is of the first importance to cultivation in the conditions that prevail in this country. There were but 900,000 acres irrigated in 1863 and there are 2,850,000 now. I cannot describe the means by which this great result has been attained ; but having visited the head-works of the Chenab Canal, which is destined in a few years when it is in full operation to convert the whole of a barren wilderness into a smiling garden, I cannot withhold a word of admiration for the care and thoroughness displayed not only in the works themselves but in the arrangements made for the convenience of the cultivators.

But if irrigation is the first thing needful, the true value of the crops it enables men to reap will not be realized if they cannot reach the markets where they must be sold. Roads, and specially metalled roads, have been constructed in all parts of the Province, but of course we look to the railways as the chief instrument of progress in this respect. It was I believe about 1863 that the first railway—that between Lahore and Amritsar, a distance of 32 miles—was opened. The mileage now is over 2,000—soon, I hope, to be further augmented—and your produce is conveyed far beyond your own limits, through the great ports of Bombay and Karachi, to compete in the markets of Europe on fair and favourable terms.

Time will not allow me to elaborate my argument. I think I have done something to show that the development of the resources of the Province and the interests of its cultivators have not been neglected. Nor do I think that any one will deny that in the protection of the rights of individuals from violence or aggression an advance has been made, and a greater feeling of security engendered, both by prudent legislation and the establishment of courts of justice open to all. I hope it is being recognised that the law, while it is strong to repress disobedience to its authority, protects and assists those who choose to co-operate with it. I am glad to find that spirit of co-operation gaining ground in religious matters also, as typified in the arch erected jointly by Hindús and Muhammadans on the occasion of my visit to Amritsar. We welcome this spirit, not because the law is not strong enough to prevent disorder, or because we are less determined than our predecessors to administer it firmly and impartially, but rather because we feel that it provides the best chance of a fair, honorable and permanent solution of difficulties that will be satisfactory to both sides.

There is no use in shutting our eyes to the fact that there are still questions of great importance, affecting the conditions under which land is held and the position of cultivators, that demand a solution. There are evils which follow close in the train of an increasing population, and increasing demands for the application of capital to land, which, unless regulated and restrained, cripple the resources of men struggling to preserve their independence, and tend to bring into existence undesirable relations between owners and occupiers. Be assured the Government will approach these questions with sympathy as well as with caution—as I think I may claim that they have shown in their recent Resolution on Forest management, to which my Hon'ble Colleague Sir A. Macdonnell

has devoted so much time and attention. No Government can afford to view with indifference the embarrassment of a class of men who here in the Punjab, have often proved the backbone of the State in peace and in war.

I should have wished to speak to you of the civilising results of education; but I have already detained you a long time, and I shall find another opportunity. I desire now to say a few words to connect the lessons of the past with the duties of the future. I wish to associate you, Princes and Chiefs, with the British Government in this matter. The British Government is proud to base its claim to the loyalty of the people of India on the justice, the purity, the benevolence of its administration. Depend upon it you can rely on no surer foundation. It used to be said that it was a fierce light which beat upon a throne; it beats now on every act of every ruler—I might almost say of every officer of Government. I am no foe to criticism; and though I think that some of the criticism to which the Government of India is subjected is ill-judged, and perhaps on occasion ignorant and prejudiced, I have to tell you that, however you may despise dishonest or abusive language, you must not look to escape honest and fair criticism. The pursuit of pleasure instead of duty, the expenditure on self-indulgence of revenues that ought to be devoted to the public advantage, the neglect of opportunities which high position, ancient lineage and great wealth can give, will not in these days escape observation, and will bring with them their own punishment in the public reprobation which I am bound to say they will deserve. I am glad to know that amongst the Chiefs of the Punjab there are those who have recognised their responsibilities, and who in the management of their States have shown an example from which any one of us might take a lesson; and I trust the good seed they have sown may bear fruit.

Princes and Chiefs, I am not here to call you to deeds of arms; but I do invite you to a contest—a contest in which you have not to overcome a single rival, but to match yourselves against the whole world. You start with many advantages. A country of marked fertility; an energetic and industrious population; personal prestige; peace abroad, and, if you and your people will, at home. Will you fail to respond to the summons? I at least have done my duty as the representative of the Queen Empress in placing before you as strongly as I can the obligation which lies upon you, as Her Majesty's loyal subjects, here in this portion of Her Empire she loves so well, to dare and to achieve the same triumphs of peace, that elsewhere have characterised and immortalised Her glorious reign.

*Closing ceremonies.—Attar* and *pán* was distributed by the Viceroy to the Ruling Chiefs, who went up to His Excellency for this purpose, in order of precedence. *His Excellency the Viceroy's speech.*—When the introductions were completed, the Viceroy and Governor-General delivered the following address to the Chiefs, Sardárs and Native Gentlemen assembled in Darbár. A translation of the address in Hindustáni was afterwards read by the Chief Secretary to the Government of the Punjab :—

PRINCES AND CHIEFS OF THE PUNJAB,—It has, I think, been said that in our meeting here to-day we renew the practice of a former generation. It is not unnatural that men's minds should turn to the proposal to hold a Darbár in this city that was made more than 30 years ago, but was not carried out, under circumstances deeply affecting myself, which I am touched to find remembered in many parts of the country. Though a generation has brought with it many changes, it has not, I think, affected what was, and is, the main consideration in summoning such an assembly—that it is good and proper and advantageous that those who are engaged in a common enterprise should come together and judge for themselves with what manner of men they are working. That at all events has been the practice of my predecessors who have constantly held Darbárs in the Punjab, and that is my object now. I have in the performance of my official duty been passing to and fro throughout your Province during the last six weeks; and it seems to me that I need make no apology for asking you, who have so great a stake therein, to meet me here that we may see each other face to face, and join hands over the great work in which we have each one of us our duties and responsibilities, of securing so far as we can the peace, prosperity, and progress of the Punjab.

Let me say now in public what I have already had an opportunity of telling some of you in private,—that it is with the greatest satisfaction and pleasure that I find myself here surrounded by the loyal Nobles and Gentlemen of the Punjab, the representatives of those who, in that former generation of which I have spoken, came to our aid in the hour of peril; of those who for many a year have shown themselves second to none in the ranks of our army by their loyalty, devotion and courage; of those who I am certain will, if need there be, stand with us shoulder to shoulder in defence of the Empire of our Sovereign—the Queen Empress.

The time has not yet come when we can set aside as of no account the martial instincts of a race. Journeying round the Frontier, and examining the forts erected for its defence at great cost, now well nigh complete, I could not but think that there was only one thing more required to make our positions impregnable, and that was brave men to hold them. Here in the home of brave men we have seen yesterday the fine regiments of the Imperial Service Troops which the Princes and Chiefs of the Punjab have raised for the avowed purpose of testifying to the world their determination to make common cause with us in the defence of the Empire. It will be my pleasing duty to report to Her Majesty, knowing as I do how sincerely she appreciates such proofs of loyal devotion from the Princes and Chiefs of India, the gallant bearing of the troops that I have seen here.

One word of caution I may add. We seek to be strong that we may be at peace. We have no ambition for conquest, no desire to extend our boundaries, no other wish than to cultivate friendship with our neighbours.

From a recent speech of the Prime Minister of England you will have learned that there is reason to hope that the time is approaching when all risk of the clashing of Russian and British interests in Asia will be obviated; and I venture to say no more welcome intelligence could be conveyed to any lover of India.

We have the great advantage of a firm friend and ally in the Ruler of Afghánistán. His Highness the Amír, whose recovery from his late illness we all hailed with pleasure, has honorably recognised the obligations of the Treaty

of last year. The difficulties of an undefined frontier have already been removed in part, and will I hope soon be entirely swept away by the efforts of Afghán and British Officers working on terms of the most complete amity.

It is our aim and ambition so to regulate our relations with the brave undisciplined inhabitants of the hills on our western border as at the same time to ensure the peace and security for life and property upon which our Treaty obligations and the dictates of humanity compel us to insist, and to leave to them the entire occupation of their country, the fullest measure of autonomy, and the most complete liberty in their internal affairs to follow their tribal customs.

I need not say with how much regret I have seen clouds arise in Wazíristán, and darken the prospect. I trust they will roll away. I can safely assert on behalf of the Government of India that though they will not allow any obstacle to prevent their pushing on to their goal, and establishing, as they intend to do, peace and order on this part of your frontier, they will not deviate from the profession I have just made, will not be turned aside by any desire for retaliation, but will maintain their set purpose of securing by peaceful means, if at all possible, one of the last links in the chain of friendly peoples.

Do not think that this is a policy we follow on the Punjab frontier alone. In the extreme West and the extreme East we are sending out Commissions with a view of determining with Persia and with France the sphere of our influence, and removing possible cause of quarrel. The conventions recently concluded with China provide for the settlement of the frontier of Burma and the promotion of trade by uniting the telegraphic systems of the two countries. The respect which we have shown for the conditions, especially in the matter of intercourse, which our neighbours consider essential for the maintenance of their independence, even though to our eyes they may seem unnecessary, has borne fruit in the convention for the purpose of opening up trade with Tibet, and in a thoroughly cordial understanding with our gallant allies in Nepal.

The fact is that this might well be termed the era of delimitation. As all over the world nations are settling disputed boundaries, so are we in India, in the hope that before many years have passed we may see our boundaries fixed from the Persian Gulf to the Malay Peninsula. It is a process which if carried out successfully must make for peace, and all here present will join with me in the earnest hope that the fair prospect which I have laid before you will remain unobscured.

If this be so, how are we to use our opportunities? The history of the Punjab during the last thirty years gives no uncertain indication of what can be done to promote the general prosperity. I have examined some very remarkable figures in connection with this subject, but I cannot on this occasion go too deeply into detail. Speaking generally, the prosperity of a country is increased—

(1) by making available the latent resources which it naturally possesses;

(2) by giving security to every man for his just share in the fruits of the earth or the products of his industry ; and

(3) by every step forward in civilisation, by the banishment of ignorance by means of education, of lawlessness and crime by firm and impartial administration of wise and just laws.

In considering the development of a country like this we naturally look first to the condition of agriculture. In the Punjab the area under cultivation has increased since 1863 from 16,800,000 acres to 26,700,000 acres. No one can doubt the importance of this increase, which improves the resources of the

Province and the revenues of its Government. I invite attention to the increase in the cultivated area which taking into consideration all possible deductions may be stated at not less than 50 per cent., while the corresponding increase of revenue from 195 lakhs to 242 lakhs has not been more than about 35 per cent. This is some evidence that Government has not been unmindful of the interests of the people. I have with my own eyes seen instances of friendly feeling between the officers of Government and the people which encourage me to believe that the present members of the Punjab Commission appreciate and loyally endeavour to maintain the traditions of the policy which will ever be identified with the names of Henry and John Lawrence.

And if we ask how the increase has been obtained, the answer is not far to seek. Irrigation is of the first importance to cultivation in the conditions that prevail in this country. There were but 900,000 acres irrigated in 1863 and there are 2,850,000 now. I cannot describe the means by which this great result has been attained; but having visited the head-works of the Chenab Canal, which is destined in a few years when it is in full operation to convert the whole of a barren wilderness into a smiling garden, I cannot withhold a word of admiration for the care and thoroughness displayed not only in the works themselves but in the arrangements made for the convenience of the cultivators.

But if irrigation is the first thing needful, the true value of the crops it enables men to reap will not be realized if they cannot reach the markets where they must be sold. Roads, and specially metalled roads, have been constructed in all parts of the Province, but of course we look to the railways as the chief instrument of progress in this respect. It was I believe about 1863 that the first railway—that between Lahore and Amritsar, a distance of 32 miles—was opened. The mileage now is over 2,000—soon, I hope, to be further augmented—and your produce is conveyed far beyond your own limits, through the great ports of Bombay and Karachi, to compete in the markets of Europe on fair and favourable terms.

Time will not allow me to elaborate my argument. I think I have done something to show that the development of the resources of the Province and the interests of its cultivators have not been neglected. Nor do I think that any one will deny that in the protection of the rights of individuals from violence or aggression an advance has been made, and a greater feeling of security engendered, both by prudent legislation and the establishment of courts of justice open to all. I hope it is being recognised that the law, while it is strong to repress d isobedience to its authority, protects and assists those who choose to co-oper ate with it. I am glad to find that spirit of co-operation gaining ground in re ligious matters also, as typified in the arch erected jointly by Hindús and Muhammadans on the occasion of my visit to Amritsar. We welcome this spirit, not because the law is not strong enough to prevent disorder, or because we are less determined than our predecessors to administer it firmly and impartially, but rather because we feel that it provides the best chance of a fair, honorable and perman ent solution of difficulties that will be satisfactory to both sides.

There is no use in shutting our eyes to the fact that there are still questions of great importance, affecting the conditions under which land is held and the position of cultivators, that demand a solution. There are evils which follow close in the train of an increasing population, and increasing demands for the application of capital to land, which, unless regulated and restrained, cripple the resources of men struggling to preserve their independence, and tend to bring into existence undesirable relations between owners and occupiers. Be assured the Government will approach these questions with sympathy as well as with caution—as I think I may claim that they have shown in their recent Resolution on Forest management, to which my Hon'ble Colleague Sir A. MacDonnell

has devoted so much time and attention. No Government can afford to view with indifference the embarrassment of a class of men who here in the Punjab have often proved the backbone of the State in peace and in war.

I should have wished to speak to you of the civilising results of education; but I have already detained you a long time, and I shall find another opportunity. I desire now to say a few words to connect the lessons of the past with the duties of the future. I wish to associate you, Princes and Chiefs, with the British Government in this matter. The British Government is proud to base its claim to the loyalty of the people of India on the justice, the purity, the benevolence of its administration. Depend upon it you can rely on no surer foundation. It used to be said that it was a fierce light which beat upon a throne; it beats now on every act of every ruler—I might almost say of every officer of Government. I am no foe to criticism; and though I think that some of the criticism to which the Government of India is subjected is ill-judged, and perhaps on occasion ignorant and prejudiced, I have to tell you that, however you may despise dishonest or abusive language, you must not look to escape honest and fair criticism. The pursuit of pleasure instead of duty, the expenditure on self-indulgence of revenues that ought to be devoted to the public advantage, the neglect of opportunities which high position, ancient lineage and great wealth can give, will not in these days escape observation, and will bring with them their own punishment in the public reprobation which I am bound to say they will deserve. I am glad to know that amongst the Chiefs of the Punjab there are those who have recognised their responsibilities, and who in the management of their States have shown an example from which any one of us might take a lesson; and I trust the good seed they have sown may bear fruit.

Princes and Chiefs, I am not here to call you to deeds of arms; but I do invite you to a contest—a contest in which you have not to overcome a single rival, but to match yourselves against the whole world. You start with many advantages. A country of marked fertility; an energetic and industrious population; personal prestige; peace abroad, and, if you and your people will, at home. Will you fail to respond to the summons? I at least have done my duty as the representative of the Queen Empress in placing before you as strongly as I can the obligation which lies upon you, as Her Majesty's loyal subjects, here in this portion of Her Empire she loves so well, to dare and to achieve the same triumphs of peace, that elsewhere have characterised and immortalised Her glorious reign.

*Closing ceremonies.—Attar* and *pân* was distributed by the Viceroy to the Ruling Chiefs, who went up to His Excellency for this purpose, in order of precedence. The Governor of Bombay, the Commander-in-Chief in India, the Lieutenant-Governor, North-Western Provinces and Oudh, the Hon'ble Lieutenant-General Brackenbury, the Hon'ble Sir Charles Pritchard, the Hon'ble Mr. Westland, the Hon'ble Sir Antony MacDonnell, the Commander-in-Chief, Madras, and the Native Chiefs in order of rank, beginning with His Highness the Mahárája of Jummoo and Kashmir and ending with His Highness the Rája of Suket, were conducted to their conveyances with similar ceremonies to those observed on their arrival.
